News Release

For Immediate Release: June 23, 2020

2020 Water Quality Reports updated on kauaiwater.org

Period covered – Jan. 1, 2019 to Dec. 31, 2019

LIHUE – The Department of Water's (DOW) 2020 Water Quality Reports, covering from Jan. 1, 2019 to Dec. 31, 2019, has been updated since June 4th in accordance to proper reporting methods and are available to view on the DOW's website at www.kauaiwater.org.

The DOW's annual water quality reports are in accordance with The Safe Drinking Water Act, a federal law which requires water utilities to provide water quality information to its customers every year. Direct link information to the water quality report for their specific water system is also noted on the customer's monthly billing statement.

Kaua'i's water is safe and is tested on a continuous schedule through the State Department of Health and DOW's certified laboratories. DOW's drinking water quality meets all of the Environmental Protection Agency's (EPA) guidelines for safe drinking water, and any contaminants found were well below the levels allowed by the EPA.

DOW's 2020 Water Quality Reports are available for public viewing online at www.kauaiwater.org. To request a paper copy of a report, please call 245-5455. Customers who have previously received a paper copy, will automatically receive the revised water quality report copy in the mail this week.
